

MOBILE WORKHORSE. CUSTOM SOLUTIONS.

TT800V 4G LTE Tablet From JACS Solutions

FULLY FEATURED, SEMI-RUGGED AND CUSTOMIZABLE, THE TT800V DELIVERS A DEDICATED BUSINESS DEVICE AND COST SAVINGS TO YOUR BUSINESS.

ROBUST AND DURABLE

- Semi-rugged, durable construction makes the device a robust workhorse even in demanding conditions
- Serve your business needs inside and outdoors with a uniquely bright (400 CD/m²) 8-inch display
- Get more done with the large capacity 6,200 mAh lithium battery – 60~72 hours standby time, 6~8 hours usage

CONNECTED FOR BUSINESS

- Drive your business anytime, anywhere with 4G LTE from Verizon and dual-band Wi-Fi (2.4/5.0 GHz)
- Get more done with a standard 2.0 USB port connecting credit card readers, NFC, RFID and others
- Connect the tools you need the most with Bluetooth 4.0 for business peripherals
- Capture vivid images and hold video conferences with both front and rear 5.0 Megapixel cameras
- Android 5.1 provides peace of mind with enhanced security and a new, improved feature set

6-pin data connector for simultaneous data and power. Optional lock for additional hardware security. 360-degree swivel configuration with additional mount arm.

DC Power options include vehicle charger (12V “cigarette lighter” adapter) and inline power inverter. Stay connected, stay productive.

Rubberized case for augmented durability and drop protection. Custom-built for the TT800V.

FULLY SECURED

Feel assured your business data is protected with the purpose-built tablet from JACS. Secured at the Operating System level and locked down with customized APK, your device will be hardened against exploits.

COST SAVINGS

Achieve cost savings with the competitively priced TT800V and lower recurring costs via JACS customization and Over-the-Air update services.

END-TO-END SUPPORT

Reduce resource consumption on standard Mobile Device Management (MDM) oversight. JACS is your one-stop-shop partner with end-to-end support from hardware to firmware.

EXTENDED LIFE CYCLE

Reduce risks and costs with an extended device life cycle. No more concerns about "end-of-life" after 12-18 months of shelf life.

YOUR OWN BRAND

Customize the tablet with your brand on the hardware and the firmware with a seamless experience. Grow your business with integrated new product offerings using the TT800V.

INDUSTRY SOLUTIONS

Improve your customer experience with innovative offerings combining TT800V with industry applications in transportation, healthcare, utility and more.

Healthcare

A healthcare provider faces the need to monitor the conditions of their patients post operations. The patient is given a TT800V with a healthcare application securely installed on the device. The device is locked down to ensure private health information stays safe and protected. The tablet is protected and its camera is modified to support the application. At home, the patient inputs his medical information using the TT800V via Verizon 4G LTE. The doctor receives this information all without the patient having to leave his home.

Transportation

A fleet management integrator utilizes the TT800V to launch a new product offering to their customer base. Their proprietary fleet management applications are uploaded on the TT800V and securely locked down so the drivers will not inadvertently modify the settings or uninstall mission critical apps. The truck drivers place the device securely in the customized vehicle mount and upload real time data on his route via 4G LTE. At each stop, he uses the NFC card reader connected to TT800V to accurately record information.

Public Sector

The local government fire department needs a cost effective and robust semi-rugged device to support its field force. Through customized APK, TT800V is securely locked down to support the Emergency Response Software. The device utilizes built-in GPS to route the responders where they need to go. En route and on site, the first responders utilize the TT800V to report, communicate and get updates via a secure connection enabled by Verizon 4G LTE.
