SOTI MOBICONTROL
FOR iOS & iPadOS

As more companies adopt new mobility policies, such as bring your own device (BYOD), corporate owned, personally enabled (COPE), corporate owned, business only (COBO), and choose your own device (CYOD), Enterprise Mobility Management (EMM) support is more important than ever. Users and devices must be quickly and securely activated, no matter where they're located. While valuable company information and apps must be protected and kept separate from personal data. SOTI MobiControl for iOS and iPadOS enables you to manage and secure any iPhone and iPad from one pane of glass, while giving on-the-go workers the apps and data they need to stay productive.

SEAMLESSLY INTEGRATE WITH APPLE BUSINESS MANAGER

SOTI MobiControl for iOS and iPadOS makes it easy for IT administrators to deploy iPhone and iPad through Apple Business Manager from one location. This saves time, money, and effort, with two key elements of device deployment.

DEVICE ENROLLMENT

- Streamline large deployments with zero-touch enrollment.
- Manage device profiles and new devices remotely without impacting the end user experience.

VOLUME PURCHASES

- Simplify the purchase and distribution of business-critical apps.
- Provide app support to mobile workers and control the flow of corporate data.

SOTI MOBICONTROL FOR iOS FEATURES

FAST AND EASY DEPLOYMENT

- Mandate new enrollment and configure all devices to your business needs.
- Make iOS devices enterprise-ready without having to touch the device.

GUARANTEE SECURITY AND PRIVACY

SOTI MobiControl lets you control your worker's mobile devices to protect valuable company data and documents.

- Restrict devices to single-app use regardless of device settings.
- Manage screen recordings/captures along with access to iCloud, iMessage, AirDrop, and/or Game Center.
- Detect and lock jailbroken devices.
- Control the installation of OS updates to patch vulnerabilities or prevent updates during critical periods.

MANAGE APPS AND CONTENT

- Create custom apps for end users and blacklist/whitelist apps on company-owned devices.
- Control whether downloads of company files can occur while the device is on cellular or while it's roaming.
- Control if company files can be downloaded to the device via cellular network or roaming networks.

DELIVER ADVANCED FEATURES

- Proactively initiate help sessions to remotely access and control iPhones and iPads.
- Remote lock and wipe lost or stolen devices.
- Create custom settings for multiple users who share a single device.

SAVE TIME WITH AUTOMATIC FEATURE IMPLEMENTATION

- No need to perform manual upgrades whenever new EMM capabilities are introduced into a new OS release.
- Ensure your mobile workforce delivers superior productivity and service away from the office.
- Give your organization a distinct mobile advantage over its competitors.
