

TABLET FOR NEXT-GEN TELEMATICS

A customizable in-vehicle tablet solution to support any Android Telematics application. Purpose built, secure and flexible, JACS' TT800V is ideal for mid-to-large fleet deployments.

**ROBUST AND
DURABLE**

It's a workhorse. TT800V is enterprise grade, semi-rugged and tested for extreme high and low temperatures to withstand demanding conditions in and out of the vehicle. The 8" display is uniquely bright to work under the sun, and the 6,200 MAh lithium battery has the capacity to last 6 hours with working applications.

**FLEXIBLE
CONNECTIVITY**

It's your choice. Choose the Verizon 4G LTE or the WiFi-only models to suit your telematics solution. Connect to your ELD device through Bluetooth, WiFi, or USB.

**LOCKED DOWN
APPLICATIONS**

It's locked down. Period. Whether your applications are for tracking, navigating or communicating, TT800V locks them down with the highest level of security and performance. Your applications will be secured at the operating system level leaving no Android backdoors open. All consumer grade applications and bloatware will be removed, and users will not be able to manipulate any business applications.

**REMOTE DEVICE
MANAGEMENT**

It's easy. JACS remote device management service helps you push firmware and application updates over-the-air with ease. You can also remotely lock, wipe and update applications by yourself using our OTA portal. Save costs and resources by eliminating or reducing the use of a traditional MDM.

TT800V

MOUNTING AND DOCKING

It's a total Solution. TT800V is equipped with customizable in-vehicle docking stations, mounting arms and cabling accessories to provide you with the perfect fit to your vehicles. Need a NFC reader, scanner, credit card reader or other peripherals? Simply connect them with the tablet via the standard USB 2.0 port.

LONGER LIFE CYCLE

It's peace of mind. Concerned about the short life cycle of consumer grade tablets? With TT800V from JACS, you gain an extended life cycle that works for your business.

CUSTOM BRANDING

It's your brand, not ours. Enjoy the added benefit of promoting your brand with your logo on the hardware and boot screen of the device.

COST SAVINGS

It's the bottom line. Reap savings with JACS competitively priced tablet and customization services. Our end-to-end support saves you time, money and valuable technical resources.
