

Lookout Mobile Endpoint Security

Providing the industry's leading mobile Endpoint Detection and Response (EDR) solution

Lookout Mobile Endpoint Security (MES) empowers organizations to protect their employees and data against mobile threats, including phishing attacks, app threats, device exploits, and risky networks.

Limitless scale to protect, detect and respond

MES is engineered to provide the industry's leading mobile Endpoint Detection and Response (EDR) solution. Backed by the intelligence of the world's largest mobile security dataset, Lookout MES protects your employees, their devices, and the data they access from modern attacks that target mobile endpoints.

Regardless of your organization's size, Lookout provides industry-leading protection against the most modern threats. Whether you're concerned about your employees falling victim to phishing and social engineering or being tracked by nation-state surveillanceware, Lookout MES has you covered.

Benefits of Lookout Mobile Endpoint Security (MES)

- Secure any iOS, Android, or ChromeOS device.
- Defend against modern threats with cloud-delivered protections.
- Align to compliance requirements while preserving end-user privacy.
- Protect any device whether it's managed, unmanaged, BYOD, or company-owned.
- Keep employee identities safe from social engineering and mobile phishing attacks.

Platform bundles	What's included
Small Business	Mobile security based on the same platform that serves the world's largest organizations, delivered as an intuitive out-of-the-box service for small business owners to protect their employees.
Essentials	Essentials gives you access to a Mobile EDR solution with comprehensive real-time protection against all mobile threats across iOS, Android, and Chrome OS devices. It provides detection and response capabilities for phishing attacks, malicious apps, device exploits, and risky networks.
Advanced	Advanced builds on Essentials by adding proactive analysis and compliance policy enforcement. It enables organizations to assess the risk of mobile devices and apps, set policies to block non-compliant apps and gain visibility into outdated device OS versions and security patch levels.
Premium	Including all the capabilities of Advanced, our Premium bundle adds a research capability to support SOC use cases like threat hunting and incident response. With Premium, your organization can proactively protect against mobile threats and access the best mobile threat intelligence available.

Mobile Vulnerability and Patch Management

Lookout Mobile Vulnerability and Patch Management provides comprehensive visibility into the versions of operating systems and mobile apps in your organization. It enables you to identify device risks, whether company-owned or employee-owned, managed or unmanaged. With Lookout, you can proactively detect vulnerabilities and ensure devices are patched to prevent data risks.

	Small Business	Essentials	Advanced	Premium
Mobile Device Vulnerability Management				
Visibility into operating system versions	■	■	■	■
Require devices to run minimum OS version	■	■	■	■
Risky device configurations	■	■	■	■
Operating systems vulnerabilities			■	■
Identify severity of vulnerabilities across fleet			■	■
Mobile App Vulnerability Management				
Drive users to update vulnerable apps	■	■	■	■
Identify and enforce use of updated apps			■	■
Block use of specific vulnerable app versions			■	■
Patch Management				
Identify latest available patches and upgrades	■	■	■	■
View patch adoption across organization	■	■	■	■
Enforce patch deployments	■	■	■	■

Threat Protections

Continuously monitor and analyze mobile devices for potential threats. With advanced machine learning and real-time monitoring, Lookout detects and alerts users to application, device, network, phishing and content threats. By providing proactive threat detection and immediate alerts, Lookout helps organizations stay one step ahead of cyber threats and protect their sensitive data.

	Small Business	Essentials	Advanced	Premium
Social Engineering Protection				
Proactive Smishing Protection	■	■	■	■
Executive Impersonation Protection		Add-on	Add-on	■
Phishing and Content Protection				
Block access to phishing links across all apps	■	■	■	■
Block malicious servers, command and control systems, and watering holes	■	■	■	■
AI powered detection of the latest phishing threats	■	■	■	■
Configurable privacy controls for admins	■	■	■	■
DNS privacy and protection (Secure DNS)			■	■
App Threat Protection				
Malware: trojans, spyware, ransomware, surveillanceware, click fraud and others	■	■	■	■
Detect rootkit exploits within apps that jailbreak or root device	■	■	■	■
Riskware: adware, spam, chageware	■	■	■	■
Detection for sideloaded apps	■	■	■	■
Device Threat Protection				
Passcode enforcement	■	■	■	■
Device encryption enforcement	■	■	■	■
Jailbreak/root detection	■	■	■	■
Advanced detection for remote-jailbreak/root	■	■	■	■
Network Threat Protection				
Man-in-the-middle attacks on both cellular and Wi-Fi networks	■	■	■	■
Secure sockets layer (SSL) attacks	■	■	■	■
Rogue Wi-Fi access points	■	■	■	■
Address resolution protocol (ARP) spoofing detection	■	■	■	■
Port Scan detection	■	■	■	■

Mobile Risk and Compliance

Protect your data to ensure compliance with industry regulations and data protection laws. With Lookout’s advanced web content filtering capabilities, organizations can automatically identify and block access to offensive, adult, violent, and criminal content. This solution enables organizations to enforce acceptable use policies, protect sensitive data, and maintain a secure mobile environment.

	Small Business	Essentials	Advanced	Premium
Web Content Filtering				
Identify or block access to adult, violent, and criminal content	■	■	■	■
Approve sites for employee use	■	■	■	■
Block sites impacting productivity, performance, and mobile data costs	■	■	■	■

Mobile App Reputation Services				
Customizable app policies		■	■	■
Custom policies for risky apps		■	■	■
App allow lists and deny lists		■	■	■
Block untrusted applications			■	■
Identify apps accessing sensitive data such as calendar or contacts			■	■
Identify apps communicating with servers in foreign countries			■	■
Identify apps communicating with cloud services			■	■
Identify risky or malicious SDKs			■	■
Identify apps that have insecure data storage/transfer			■	■
Out of the box application risk grading			■	■
Public and private app upload and analysis			■	■

Mobile Zero Trust				
On-device data access controls	■	■	■	■
MDM access based controls		■	■	■
MAM access based controls		■	■	■

Management and Integration Capabilities

Lookout offers robust management and integration capabilities to streamline your security operations. With Lookout, you can easily integrate with existing infrastructure such as SSO, MDM, SIEM, and data classification systems. You can also export events to major SIEM/SOAR/XDR solutions for comprehensive visibility and control.

	Small Business	Essentials	Advanced	Premium
--	----------------	------------	----------	---------

Multi-tenancy Management Capabilities

Manage Multiple consoles with SSO	■	■	■	■
Centralized Policy Configurations	■	■	■	■
Ability to filter MES tenants based on current risk	■	■	■	■
Full data set segregation of tenants	■	■	■	■

Enhanced Management Capabilities

Zero-touch deployment		■	■	■
Data privacy controls	■	■	■	■
Advisory Risk Level	■	■	■	■
Policy Escalation/Grace periods			■	■
Custom Threat Messages			■	■

Mobile Intelligence APIs

Mobile Risk API		■	■	■
Third-Party Web Content Threat Feed API			■	■
Vulnerability API			■	■

Integrations

Android Enterprise Dual Persona Protection		■	■	■
UEM integration for MDM and/or MAM support		■	■	■
Identity access management (IAM) integration		■	■	■
Security incident event management (SIEM) integration		■	■	■
Granular Threat Sync			■	■

Threat Intelligence and Research

Lookout Threat Intelligence and Research enable security teams to quickly detect, investigate, and respond to mobile threats. With access to the industry’s largest mobile telemetry dataset, Lookout provides real-time visibility into mobile incidents, allowing for proactive threat hunting and containment. This comprehensive platform helps organizations protect their data, prevent data breaches, and make informed decisions to strengthen their mobile security posture.

About Lookout

Lookout, Inc. is the data-centric cloud security company that uses a defense-in-depth strategy to address the different stages of a modern cybersecurity attack. Data is at the core of every organization, and our approach to cybersecurity is designed to protect that data within today's evolving threat landscape no matter where or how it moves. People — and human behavior — are central to the challenge of protecting data, which is why organizations need total visibility into threats in real time. The Lookout Cloud Security Platform is purpose-built to stop modern breaches as swiftly as they unfold, from the first phishing text to the final cloud data extraction. We are trusted by enterprises and government agencies of all sizes to protect the sensitive data they care about most, enabling them to work and connect freely and securely.
